Professional Summary

Detail-oriented Computer Science graduate with strong analytical, problem-solving, and communication skills. Proficient in Python, SQL, Excel, and database management with hands-on experience in Data analysis, Reporting, and Software development and Database management projects. Quick learner with excellent attention to detail and a passion for continuous improvement and delivering quality solutions.

Technical Skills

- Programming Languages: Python, SQL, Javascript
- Data Analysis & Machine Learning: Pandas, NumPy, Scikit-learn, Data Analysis, Machine Learning
- Web Technologies: HTML5, CSS3, JavaScript, FastAPI, REST APIs
- Databases: MySQL, MongoDB
- Data Analysis & Visualization: Power BI, Excel, Matplotlib
- Concepts: Data Analysis, Data Validation, Documentation, Reporting, OOP, DBMS, Data Structures & Algorithms

Projects

- **Responsive Web Application**
  • Developed a responsive web application using HTML5, CSS3, and JavaScript with a focus on usability, accessibility, and cross-device compatibility.
  • Integrated REST APIs and interactive components to ensure accurate data exchange and seamless user experience.
  • Tested, debugged, and optimized application performance while following web development best practices.
  • Managed source code using GitHub and maintained clear project documentation for efficient collaboration.
- **Database Management System**
  • Designed and implemented a normalized relational database system using MySQL
  • Developed optimized SQL queries, joins, and CRUD operations for efficient data management.
  • Ensured data integrity through normalization and transaction management.
- **Machine Learning Pipeline**
  • Collected, validated, and analyzed datasets using Python and Scikit-learn.
  • Performed data preprocessing and generated analytical insights.
  • Improved data quality through feature engineering and model evaluation.
- **End-to-End Time Series Forecasting System**
  • Developed an end-to-end Time Series Forecasting System using Python to predict next 8 weeks of state-wise sales using historical sales data.
  • Built a production-ready REST API using FastAPI for automated best model selection and real-time sales prediction deployment.

Certifications

- Build a Computer Vision Application with Azure Cognitive Services - Microsoft/Coursera (Dec 2025)
  Link: https://coursera.org/verify/AP3TW9F6YJ1V
- QA Analyst with AI - Unstop (May 2026)
  Link: https://unstop.com/certificate-preview/73b68539-cf55-4446-a02c-2309e061f6b6

Education

- **Vels University** 2022-2026
  B.Tech in CSE (Artificial Intelligence & Machine Learning) | 6.33 CGPA

Soft Skills

- Attention to Detail | Communication Skills | Team | Collaboration | Time Management | Planning & Organization | Problem Solving | Analytical Thinking | Adaptability | Continuous Learning
